Subject: Letter of reference for Mr. Heyko Wolfgang Wedekind, born on 20.02.1977

I became acquainted with Mr. Wedekind, as a partner of the company Field Camp Services (FCS), within the framework of the technical operation of the military installations operations centre Camp Marmal in Mazar-e-Sharif, Afghanistan, already at the beginning of 2014.

The cooperation with Mr. Wedekind always proved to be open, purposeful and constructive, such as with regard to the handover of the *sewer construction and maintenance of the sewerage network* by the Technical Facility Management (TGM) to the company FCS, within the framework of the main focus of the last few months that was accompanied Mr Wedekind. Priority had thereby to be given to the handling of a variety of problem areas, since such a handover of the technical operation of a field camp of this size, in essence constitutes a pilot project. On account of the professional expertise of Mr. Wedekind as a project manager in conjunction with the customer and solution-oriented working method, the handover was handled smoothly and from the perspective of the Technical Facility Management (TGM), shall serve as a model for other projects of a similar nature.

In addition, Mr Wedekind was the contact partner for the remedying of warranty claims in the area of maintenance time for helicopters. Within the framework of the assessment and repair, it was possible to work out a solution to existing problems in an uncomplicated manner, together with Mr Wedekind.

The overall co-operation with Mr. Wedekind as such had an utmost positive impact. This was not only reflected by the on schedule compliant processing of inquiries and orders, but also in solution-oriented project work in the field of wastewater operations and general operation of technical infrastructure. His open, polite and friendly manner led to very close collaboration with the Administrative Office of the Deployed Armed Forces.

I am extremely convinced of the nature of collaboration with Mr. Wedekind, and as such certainly pleased to issue a letter of recommendation in this regard and look forward to further projects with him

Best regards
